Before beginning:

1. After connecting to the VPN using Junos Pulse, open the Remote Desktop program.

Finder > Applications > Microsoft Remote Desktop

2. Click on the New button.

3. In the text box labeled Connection name, enter a description, such as “Office Computer”

4. In the text box labeled PC name, enter your office computer’s IP Address. If you don’t know your office computer’s IP Address, contact NVC Information Services at nvccomputerhelp@vt.edu.

5. In the User name text box enter, NVC\Your PID. Example: If your PID is hbird, you would enter NVC\hbird

6. Click on the Close window button.
7. Click on the computer listed under My Desktops.

8. Click on the Start button.

9. In the Password text box, enter the password to your office computer.

10. Click the OK button.

11. After a few moments, you will be connected to your office computer.

12. If you receive a “The certificate could not be verified back to a root certificate” warning message, click on the Continue button.
