1. After connecting to the VPN using Junos Pulse, open the Remote Desktop Connection program.

   **Start > All Programs > Accessories > Remote Desktop Connection**

2. In the text box labeled *Computer*, enter your office computer’s IP Address. If you don’t know your office computer’s IP Address, contact NVC Information Services at nvccomputerhelp@vt.edu.

3. Click the *Connect* button.

   When you are prompted for a username and password:

4. In the *User name* text box enter, **NVC\Your PID**. **Example:** If your PID is hbird, you would enter **NVC\hbird**

5. In the *Password* text box, enter the password to your office computer.

6. Click the *OK* button.

7. After a few moments, you will be connected to your office computer.

8. If you receive a “*computer cannot be verified*” warning message, put a check in the box next to “*Don’t ask me again for connections to this computer*”.

9. Click on the *Yes* button.
